Education

Vellore Institute of Technology

Bachelor of Technology in Computer Science (GPA: 7.73 / 10.0)

Narayana IIT Academy

Intermediate Education (Percentage: 92%)

October 2022 -May 2026

Bhopal, Madhya Pradesh

June 2019 -May 2021

Hyderabad, Telangana

Technical Skills

Languages: Python, SQL, Java, HTML, CSS, JavaScript

Frameworks & Libraries: ReactJS, Node.js, Express.js, MongoDB (Mongoose), Stream Chat SDK, Jitsi Meet, Google Translate API, Hugging Face Transformers, PyTorch, TensorFlow, Scikit-Learn, LangChain, Pandas, NumPy, Matplotlib

GenAI & Tools: OpenAI API, Hugging Face Hub, LangChain, LlamaIndex, ChromaDB, Postman, Git, VS Code

Platforms & IDEs: Google Colab, PyCharm, Visual Studio Code

Soft Skills: Strong Problem Solving, Rapid Learning, Collaboration, Clear Communication

Projects

Chaupal | ReactJS, Node.js, Express.js, MongoDB, Stream Chat SDK, Jitsi Meet, Google Translate

- Designed and implemented a mobile-first ReactJS frontend with secure user authentication and profile management using Node.js, Express.js, and universal-cookie for session handling
- Integrated Stream Chat SDK to enable real-time group messaging and embedded Jitsi Meet for seamless video conferencing among Self-Help Group members
- Developed a MongoDB-backed database interface for managing loan applications and resource requests, featuring dynamic sorting, filtering, search, and CSV export functionality
- Added multilingual support via Google Translate widget and optimized the platform for low-bandwidth environments with offline-sync readiness; deployed full-stack application on Vercel/Netlify for scalable hosting

Online Quotation Generator | Next.js, Firebase, React, TypeScript

- Developed a full-stack quotation generator using Next.js to streamline sales and enable PDF downloads.
- Implemented secure user authentication and real-time data storage with Firebase (Auth and Firestore).
- Built a responsive and modern UI with React/TypeScript, and Tailwind CSS.
- Managed complex forms and ensured data integrity using React Hook Form and Zod for validation.

Resume Analyzer | Hugging Face Transformers, Python, Streamlit, Pandas

- Utilized Hugging Face transformers to extract key skills and qualifications from resumes and match them against job descriptions
- Developed a Streamlit-based UI for users to upload resumes and receive instant feedback on job-fit based on scoring algorithms
- Added an email functionality to send personalized feedback to applicants after resume analysis

Certifications

Applied Machine Learning in Python | [CERTIFICATE](#)

December 2023

University of Michigan

- Built supervised and unsupervised ML models using Python and scikit-learn.
- Applied cross-validation and evaluation metrics to real-world datasets.

Generative AI with IBM Watsonx | [CERTIFICATE](#)

April 2025

IBM

- Explored foundation models and prompt engineering using IBM Watsonx.
- Worked with model lifecycle tools for secure and scalable GenAI deployment.

The Bits and Bytes of Computer Networking | [CERTIFICATE](#)

December 2023

Google

- Learned computer networking fundamentals: protocols, DNS, TCP/IP, routing, and security.
- Gained essential knowledge for deploying APIs, LLMs, and microservices in distributed systems.
