Summary

Aspiring Product Manager (Intern) with a technical background in Computer Science and Data Science. Proven track record of building user-centric AI solutions and leveraging data-driven experimentation to solve complex user challenges. Passionate about health-tech and D2C growth, specifically in creating habit-forming products and optimizing conversion funnels through clinical education and hyper-personalization.

Technical & Product Skills

Product Management: Product Requirement Documents (PRDs), User Journey Mapping, Wireframing (Figma), A/B Testing, Feature Prioritization (RICE/Kano), Competitor Benchmarking
Data & Analytics: SQL, Python (Pandas, Scikit-learn), Google Analytics, Metabase, Retention Analysis, Cohort Modeling
AI & Engineering: Gemini 2.5 Flash, LLM Orchestration (Genkit AI), Prompt Engineering, JSON Schema, Streamlit, Git

Projects

- D2C Conversion Funnel Optimization

2025

 - Analyzed the "Hair Test" results page and designed an A/B test to restructure information architecture, replacing text-heavy blocks with 3-science video clips (Ayurveda, Dermatology, Nutrition).
 - Optimized "Test-to-Purchase" conversion metrics by aligning product bundle descriptions with the specific "Root Cause" identified in the diagnostic algorithm.
 - Created low-fidelity wireframes in Figma for a "Doctor's Word" pop-up feature to build trust and highlight Traya's clinical-backed value proposition.
- ClaimGuard: Trust-First Risk Infrastructure

2024

 - Developed a zero-shot fraud classification product that automated analysis for 100,000+ rows, shifting focus from pure detection to "Model Interpretability" for non-technical stakeholders.
 - Implemented semantic risk factor extraction (e.g., "Inconsistent History") to provide plain-language explainability, improving trust scores in internal audit workflows.
- DocGen AI: Efficiency Product for Ops

2024

 - Architected an LLM orchestration tool that reduced content drafting latency by 80%, serving as a "Product Owner" to define technical specs for JSON Schema enforcement.
 - Defined success metrics focused on "Time-to-Value" for end-users, ensuring 100% structural consistency across multi-section clinical documentation.

Leadership & Positions of Responsibility

- Edu4UClub, VIT Bhopal

Feb 2023 – Present

Technical Product Operations Lead

Bhopal, MP

 - Acted as internal Product Owner for club systems, designing automated workflows that improved core team productivity and reduced manual administrative tasks by 20%.
 - Collaborated with cross-functional teams to prioritize feature backlogs, ensuring technical feasibility aligned with organizational goals.[10]
 - Managed end-to-end deployment of internal tracking systems, gathering feedback from 50+ members to iterate on usability and user satisfaction.
- Health-o-Tech Club, VIT Bhopal

Apr 2024 – Present

Growth & Community Outreach Lead

Bhopal, MP

 - Designed and executed a data-driven user acquisition strategy, resulting in a 40% increase in student engagement and event participation.
 - Analyzed post-event feedback and participation metrics to inform future product roadmaps, optimizing for higher retention and student interest.[13]
 - Spearheaded community outreach efforts, establishing a "user-first" brand voice that increased organic inquiries by 25% Month-on-Month.

Achievements & Certifications

Applied Machine Learning in Python <i>University of Michigan</i>	2023
Generative AI with IBM Watsonx <i>IBM</i>	2025
SQL (Basic) <i>HackerRank</i>	2024

Education

Vellore Institute of Technology	Bhopal, MP
Bachelor of Technology in Computer Science (CGPA: 7.81/10.0)	2022 - 2026
