## Summary

Detail-oriented Computer Science student with a strong foundation in software development and manual testing. Proficient in creating test cases, executing API testing with Postman, and understanding the Bug Lifecycle. Eager to leverage technical skills in Python, Java, and SQL to ensure high-quality, bug-free web applications.

## Technical Skills

**Languages:** Python, SQL, Java, HTML, CSS, JavaScript

**Testing & QA:** Manual Testing, SDLC, STLC, Bug Lifecycle, API Testing, Jira, Selenium (Basic)

**Frameworks & Libraries:** ReactJS, Node.js, Express.js, MongoDB (Mongoose), Stream Chat SDK, Jitsi Meet, Google Translate API, Pandas, NumPy, Matplotlib

**Tools:** Postman, Git, VS Code

**Platforms & IDEs:** PyCharm, Visual Studio Code

**Soft Skills:** Strong Problem Solving, Rapid Learning, Collaboration, Clear Communication

## Projects

**Chaupal** | *ReactJS, Node.js, Express.js, MongoDB, Stream Chat SDK, Jitsi Meet*

[GitHub](#)

- Designed a mobile-first ReactJS frontend with secure user authentication, and performed manual UI testing to ensure seamless profile management workflows.
- Integrated Stream Chat SDK and Jitsi Meet, executing rigorous test cases on real-time group messaging and video conferencing features to ensure stability.
- Developed a MongoDB-backed database interface and validated data integrity by testing dynamic sorting, filtering, search, and CSV export functionality.
- Added multilingual support via Google Translate, conducting localized sanity checks, and verified platform stability after deployment to Vercel/Netlify.

**Online Quotation Generator** | *Next.js, Firebase, React, TypeScript*

[GitHub](#)

- Developed a full-stack Next.js quotation generator and performed end-to-end manual testing to streamline the sales workflow and validate PDF downloads.
- Implemented secure Firebase authentication and conducted API testing using Postman to verify real-time data storage and retrieval.
- Built a responsive React UI with Tailwind CSS, identifying and reporting cross-browser compatibility bugs to ensure a modern user experience.
- Managed complex forms using React Hook Form and Zod, executing strict boundary testing to ensure data validation and prevent user input errors.

**Clara Onboarding Automation** | *Python, Scripting, Automation*

[GitHub](#)

- Developed a Python-based automation pipeline to streamline employee onboarding processes and minimize manual data entry errors.
- Performed rigorous boundary and exception testing on the automation scripts to ensure 100% reliability and prevent silent failures.

## Certificates

**Cyber Security Analyst** - IBM (2025)

[Certificate](#)

**Applied Machine Learning in Python** - University of Michigan (2023)

[Certificate](#)

**Generative AI with IBM Watsonx** - IBM (2025)

[Certificate](#)

**The Bits and Bytes of Computer Networking** - Google (2023)

[Certificate](#)

## Education

**Vellore Institute of Technology**

Bachelor of Technology in Computer Science • CGPA: 7.81 / 10.0

Bhopal, Madhya Pradesh | 2026
